	The data refer to the product as delivered. The solutions for use produced according to dilution recon differently.	nmendations are to be classified				
	Can harm the aquatic fauna when entering surface waters.					
	Can harm the bacteria population in waste water treatment plants when entering the sewerage syste	m.				
	Breathing is not possible whilst submerged in the foam. Take care when spraying people!					
	The product contains fluorosurfactants that are not completely biodegradable.					
	Concentrated surfactant solutions always pose a danger to aquatic life because they greatly reduce t	the surface tension of water thus				
	disrupting all life processes associated with it. In sewage treatment plants, for example, the necessar	y aeration of the sewage stages can be				
	hindered by the strong foam formation.

General information

Remove contaminated, saturated clothing immediately. Wash thoroughly the body (shower or bath). Observe risk of aspiration if vomiting occurs. When in doubt or if symptoms are observed, get medical advice.

Following inhalation

Provide fresh air. Consult a doctor immediately in the case of inhaling spray mist and show him packing or label.

In case of skin contact

Wash immediately with:: Water

After eye contact

In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist.
