

Scope of the environmental management system (EMS)

The scope of the EMS of the Fabrik chemischer Präparate von Dr. Richard Sthamer GmbH & Co. KG, Liebigstraße 5, 22331 Hamburg (Dr. STHAMER) covers the production site in Hamburg and the associated activities, processes, products and services that directly or indirectly affect the environment.

Dr. Sthamer's **activities** include: Development, production and distribution of fire extinguishing foam agents and concrete admixtures.

In detail:

- research and development of fire extinguishing foam agents and foaming agents,
- purchase of raw materials, supplies and packaging materials,
- production of foam extinguishing agents and foaming agents,
- distribution of foam extinguishing agents and foaming agents in Germany and abroad,
- consulting of customers,
- analysis of foam extinguishing agents.

In principle, environmentally relevant aspects and requirements are anchored in the processes in all areas of the company due to the raw materials to be processed, water consumption, the purpose of the products, the geographical location of the production site on surface water, waste disposal and the consumption of operating materials, the trips to be made and customer visits. Regulatory monitoring is consistent and continuous.
